NOTES

Only new first time students are included in graduation rate calculations

All numbers are percentages, calculated as (Count of 150% time graduated students in cohort/ count of total cohort)

A degree-seeking student is identified as "graduated" if said student receives a degree within 150% time of the degree's stated length (three years for an Associate's level degree)

Non-degree seeking students are excluded from any graduation calculations

A blank cell indicates a cohort that has zero students
