NOTES

All numbers are percentages, calculated as (Count of persisting students in cohort/ count of total cohort)

A degree-seeking student is identified as "persisted" if said student enrolls one standard term after the identified term (i.e. a student who is enrolled in fall enrolls in the following spring, and a student who is enrolled in spring enrolls in the following fall)

Non-degree seeking students are excluded from any persistence calculations

Students who receive a degree within the persistence timeframe are counted as "persisted" for rate calculation purposes
