NOTES

All numbers are percentages, calculated as (Count of retained students in cohort/ count of total cohort)

A degree-seeking student is identified as "retained" if said student enrolls two standard terms after their first term of matriculation (i.e. a student who starts in fall enrolls in the following fall, and a student who starts in spring enrolls in the following spring)

Non-degree seeking students are excluded from any retention calculations

The Native Hawaiian or Other Pacific Islander ethnicity category is excluded from calculations due to single-digit enrollment across all terms from this category

Students who receive a degree within the retention timeframe are counted as "retained" for rate calculation purposes
