

PRECISION DRIVING TRAINING CENTER (PDTC)

OSU-OKC's Precision Driving Training Center (PDTC) is a unique facility in the region. The Center focuses on partnering with private and public entities, and individuals that share an interest in furthering knowledge and expertise in the areas of defensive driving and safety.

The purpose of the Center is to provide quality training programs for Business and Industry and the general public. The Center's mission includes assisting our Business and Industry clients to meet the following safety goals:

- To save lives and reduce the risk of life-altering injuries within the workforce.
- To protect the organization's human and financial resources.
- To guard against potential company and personal liabilities associated with crashes involving employees driving on company business.

ADVANCED DRIVER TRAINING COURSES

The Center specializes in unique driver training courses going beyond the classroom to include hands-on driving experience on the campus' specially designed training track.

- 40-Hour CDL Prep Course
- 8-Hour CDL Prep Course
- Class B CDL

PUBLIC SAFETY COURSES

- Basic Law Enforcement Driver Training (BLEDT) CLEET Accredited
- Advanced Law Enforcement Driver Training (ALEDT) CLEET Accredited
- Fire/EMS Driver Training

PRECISION DRIVING TRAINING

This hands-on defensive driving course is built on five key elements – visual perception, concentration, knowledge, judgment and skills. Participants spend approximately two hours in the classroom and the remainder of the day on OSU-OKC's secure driving range practicing those elements through hands-on training.

The Center's facility has a secured ¾-mile highway response course, off-the-road recovery, a large skills pad, and a Skidpad that allows participants to experience different types of driving maneuvers that increases their abilities in real-life situations.

SKIDCAR TRAINING

The SkidCar System is an advanced driver training solution that teaches drivers to anticipate vehicle control problems before they occur. With the SkidCar drivers experience how a vehicle will react in situations that cause traction loss, including adverse weather, excessive speed, rapid braking or steering errors. SkidCar training teaches drivers to think, maintain control and avoid trouble ahead of time.

LOAD SECUREMENT FOR COMMERCIAL VEHICLES (CMV)

This course is designed to instruct drivers on how to properly secure various load types. The eight-hour course consists of both classroom and hands-on demonstrations and practice. This course will address each of the most common types of cargo and will be customized to meet the companies load securement issues.

Participants will apply the requirements in the North American Cargo Securement Standard, safely load and secure their load, and inspect a secured load for compliance under Federal Guidelines.

TEEN DRIVING

Driver's Education

This course is structured to provide students with information necessary to become licensed drivers in the state of Oklahoma, shape attitudes that will be taken with them when getting behind the wheel of an automobile, and form an understanding of the skills necessary to operate a motor vehicle safely. Students will attend 10 hours of classroom and receive six hours of one-on-one driving instruction.

Alive@25

This course is a highly effective one day course that addresses the issues that plague teen drivers. This course is designed for drivers ages 15½-21 that have an active learner's permit or driver's license. Defensive driving practices include accident avoidance, a distraction course, off-the-road recovery, controlled braking and skid avoidance and recovery.

MOTORCYCLE RIDER TRAINING

Increase confidence, improve motorcycle skills and learn how to have more fun by riding motorcycles safely. The following courses upon successful completion meet state requirements for the "M" endorsement:

- Basic Rider Course (BRC) teaches the fundamental skills for safe riding. Motorcycles provided. Basic Rider Course 2 (BRC2) is for the motorcycle enthusiasts looking to hone their skills. Participants must provide their own bike and insurance verification, and have at least six months street riding experience.
- Three-Wheel Basic Rider Course (3WBRC) is for new riders, experienced riders transitioning into the world of three-wheel motorcycles, or riders with some experience riding three-wheel motorcycles. Participants must furnish their own

PRECISION DRIVING TRAINING CENTER (PDTC)

bike and insurance verification.

Upon successful completion of these courses, the state-written and road exam at the Department of Public Safety will be waived.

Ready to Ride (R2R) is a more advanced course designed for the rider who wants to strengthen critical road skills. This course is offered for both Two-Wheel and Three-Wheel motorcycles. Participants must provide their own bike.

- American Heart Saver CPR BLS for Healthcare Providers

AMERICAN HEART SAVER CPR BLS FOR HEALTHCARE PROVIDERS

This four-hour course is designed for health-care professionals. The course covers adult, child and infant one-rescuer CPR AED as well as a new focused emphasis on teamwork with the adult, child, and infant two-person rescue. Topics also include Rescue Breathing and Foreign Body Air-way Obstruction.
